

METALLURGIA—Index to Volume LXV

Published by the Kennedy Press, Ltd., 31 King Street West, Manchester 3

JANUARY—JUNE 1962

LEADERS

Aluminium on Wheels	105
Coal and Oil Prices	207
Commonwealth and Steel, The	53
National Productivity Year	157
Standards and Quality	257
Steel Market 1961-62, The	1

ARTICLES

A

Aluminium Alloys (Anodising Characteristics of), Analysis of the Effects of Some Metallurgical Structure Factors on the, By J. G. Morris	216-220
Aluminium Alloys. Relationship Between Hardness and Tensile Properties Over a Wide Range of Temperature for, By E. R. Petty	25-26
Aluminium and its Alloys in 1961, By E. Elliott	59-64, 112-123
Aluminium Coating of Steel Strip. (B.I.S.R.A.)	171-176
Aluminium Containing 0-2 at.-% Magnesium in the Temperature Range 200°-350° C. The Tensile Creep Properties of, By R. Doldon	125-131
Aluminium Embedded in Building Mortars and Plasters—Ten-Year Tests. By F. C. Porter	65-71
Aluminium in Prefabricated Buildings	55-58
Aluminium in Road Transport	133-136
Annealing (Continuous) of Steel Strip (B.I.S.R.A.)	171-176
Anodising Characteristics of Aluminium Alloys. Analysis of the Effects of Some Metallurgical Structure Factors on the, By J. G. Morris	216-220

B

Backbarrow Furnace Still in Production after Two and a Half Centuries of Iron Smelting. By W. H. Sansom	165-170
Building Mortars and Plasters, Aluminium Embedded in—Ten-Year Tests. By F. C. Porter	65-71

C

Carbon Steel Castings. The Effect of Residual Elements on the Magnetic Properties of, By W. J. Jackson and E. J. Ridal	221-228
Chromium (High Purity), Production of, from an Aqueous Fluoride Bath. By E. A. Brandes and J. A. Whitaker	209-212
Cobalt-Base Stellite Alloys. Hot Hardness Properties of, By R. E. Phelps	229-231
Cold Forging of Steel, Lubrication in the	18-20
Corrosion-Fatigue of Sharply Notched Steel Specimens, By D. S. Dugdale	27-28

Creep Properties (The Tensile), of Aluminium Containing 0-2 at.-% Magnesium in the Temperature Range 200°-350° C. By R. Doldon	125-131
--	---------

F

Fatigue (Corrosion), of Sharply Notched Steel Specimens. By D. S. Dugdale	27-28
Fatigue Limits of Mild Steel, Surface Layer Effects When Comparing Reversed Direct-Stress and Rotating Bending. By N. E. Frost and K. Denton	287-290
Furnace (Heat Treatment) Recent Installations	265-286, 293

H

Hardness and Tensile Properties (Relationship Between), Over a Wide Range of Temperature for Aluminium Alloys. By E. R. Petty	25-26
Hardness (Hot) Properties of Cobalt-Base Stellite Alloys. By R. E. Phelps	229-231
Heat Treatment Furnace Installations, Recent	265-286, 293
Heat Treatment. Surface Protection During (Berkatekt)	232-234
Heat Treatment, Vacuum, By F. J. Becket and P. Burtenshaw	107-111, 181-185

I

Iron Smelting. Backbarrow Furnace Still in Production after Two and a Half Centuries, By W. H. Sansom	165-170
---	---------

L

Low Temperature Mechanical Properties of Cast Stainless Steels. The Influence of Carbon and Nickel on the, By G. Mayer and K. Balajiva	11-17
Lubrication in the Cold Forging of Steel	18-20

M

Magnetic Properties of Carbon Steel Castings. The Effect of Residual Elements on the, By W. J. Jackson and E. J. Ridal	221-228
--	---------

N

National Engineering Laboratory	259-264
Nimonic 75 in Contact with a Heat Insulating Material at 800° C., Sulphur Attack on, By S. R. Billington	3-9

P

Prefabricated Buildings, Aluminium in,	55-58
--	-------

R

Road Transport, Aluminium in,	133-136
-------------------------------	---------

S

Silver-Rich Tin-Silver Alloys, Some Properties of, By R. Duckett, D. A. Robins and S. C. Britton	291-293
Situations Vacant. By A. J. Gibbs-Smith	31-32
Sodium Reduction Processes, A Century of, By M. Schofield	21-24
Stainless Steels (Cast), The Influence of Carbon and Nickel on the Low Temperature Mechanical Properties of, By G. Mayer and K. Balajiva	11-17
Steel Strip Developments, B.I.S.R.A. (Aluminium Coating and Continuous Annealing)	171-176
Sulphur Attack on Nimonic 75 in Contact with a Heat Insulating Material at 800° C. By S. R. Billington	3-9
Surface Layer Effects When Comparing Reversed Direct-Stress and Rotating Bending Fatigue Limits of Mild Steel. By N. E. Frost, and K. Denton	287-290
Surface Protection During Heat Treatment. (Berkatekt)	232-234

T

Tensile Properties and Hardness (Relationship Between), Over a Wide Range of Temperature for Aluminium Alloys. By E. R. Petty	25-26
Tin-Silver Alloys (Silver-Rich), Some Properties of, By R. Duckett, D. A. Robins and S. C. Britton	291-293

V

Vacuum Heat Treatment. By F. J. Becket and P. Burtenshaw	107-111, 181-185
--	------------------

W

Welding, Developments in Arc. By W. I. Pumphrey	159-163
---	---------

LABORATORY METHODS

Aluminium Alloys, The Direct Polarographic Determination of Cadmium in, By R. A. Hine and J. F. Bates	101-103
Aluminium-Silicon Alloys, Determination of Phosphorus in, By M. L. Davey	151-152
Analytical Results, Automatic Computation of,	201-202
Antimony, Copper, Iron and Bismuth, The Estimation of Traces of, in Zone Refined Lead. By J. A. Corbett	43-47
Automatic Computation of Analytical Results	201-202
Bismuth, Copper, Iron and Antimony, The Estimation of Traces of, in Zone Refined Lead. By J. A. Corbett	43-47

	Page
Cadmium in Aluminum Alloys, The Direct Polarographic Determination of, By R. A. Hine and J. F. Bates.	101-103
Ceramic Slip Preparation, Value of pH Control During,	103
Copper, Iron, Bismuth and Antimony, The Estimation of Traces of, in Zone Refined Lead. By J. A. Corbett	43-47
Corrosion Experiments, The Electrolytic Generation of Hydrogen for, By T. C. Downie and C. W. Goulding.	48
Direct Reading Attachment (Hilger) to the Spectrographic Analysis of B.S.L65 Type Alloy, The Application of the, By E. C. Mills and S. E. Hermon	49-52
G.K.N. Fasteners Corrosion Laboratory and Technical Centre in Birmingham	155-156
High Temperature Tensile Testing Equipment	153-154
Hydrogen for Corrosion Experiments, The Electrolytic Generation of, By T. C. Downie and C. W. Goulding.	48
Iron, Copper, Bismuth and Antimony, The Estimation of Traces of, in Zone Refined Lead. By J. A. Corbett	43-47
Jack Hammer (Ultrasonic) Developments. By W. J. McGonnagle	205-206
Lead (Zone Refined), The Estimation of Traces of Copper, Iron, Bismuth and Antimony in, By J. A. Corbett	43-47
Liquid Ion-Exchange Resins in Analysis, The Application of, Part I—The Reactions of Iron. By H. Green	305-307
Metallographic Examination, The Preservation of Fragile Oxide-on-Metal Coatings for, By N. A. Burley and J. J. Dale	203-204
Microphotometer (Recording) for X-Ray and Spectrographic Analysis, A. By A. Argyle P. Dewell, and R. Rew	249-254
Monazite Sand, Chemical Analysis of, By Dr. F. Hashabi	255-256
Nickel, The Potentiometric Determination of, By N. M. Silverstone	99-100
Niobium and Niobium Alloys, The Analysis of, By W. T. Elwell and D. F. Wood	308-310
Oxide-on-Metal Coatings (Fragile), The Preservation of, for Metallographic Examination. By N. A. Burley and J. J. Dale	203-204
Phosphorus in Aluminium-Silicon Alloys, Determination of, By M. L. Davey	151-152
Polarographic (Direct) Determination of Cadmium in Aluminium Alloys, The, By R. A. Hine and J. F. Bates	101-103
Polishing Disc, Self-Adhesive Foam Fabric	104
Potentiometric Determination of Nickel, The, By N. M. Silverstone	99-100
Spectrographic Analysis of B.S.L65 Type Alloy, The Application of the Hilger Direct Reading Attachment to the, By E. C. Mills and S. E. Hermon	49-52

	Page
Spectrographic (and X-Ray) Analysis A Recording Microphotometer for, By A. Argyle, P. Dewell and R. Rew	249-254
Ultrasonic Jack Hammer Developments. By W. J. McGonnagle	205-206
X-Ray and Spectrographic Analysis, A Recording Microphotometer for, By A. Argyle, P. Dewell and R. Rew	249-254

PLANT AND LABORATORY DESCRIPTIONS

Aluminium Rolling Mill, New Zealand's First.	79-80
Brazing and Heat Treatment, Contract. (Delaney Gallyay)	213-215, 220
Castings (Steel), Non-Destructive Testing, (K. & L. Steelfounders')	235-238
Crittall's New Galvanising Plant.	295
Galvanising Plant, Crittall's New,	295
Gas Carburising Plant, Sealed Quench,	163-164
Heat Treatment, and Contract Brazing, (Delaney Gallyay)	213-215, 220
Melting Furnace (Oil-Fired), for Roll Production	185-186
Non-Destructive Testing Steel Castings, (K. & L. Steelfounders')	235-238
Sealed Quench Gas Carburising Plant,	163-164
Strip Production, Scottish Wide Steel.	75-79
Vacuum Melted Alloy Steel Production, (Hadfields)	84-88
Vacuum Melted Alloys	177-180

SHORT ARTICLES

Aluminium in Road Transport,	133-136
Continuous Casting of Steel Slabs, (Dillinger)	187-188
Fork-Lift Truck, Upside-Down	296
Hardening, Automatic Induction	137-138
High Temperature Service, New Steel for,	71-73
Hover Pulley, The	29-30
Hundred Years of Quality Steelmaking, A.	294
Induction Hardening, Automatic	137-138
Road Transport, Aluminium in	133-136
Rod Coil Compressor	123-124
Smelting Process (New Finnish), Employs British Toroidal Combustion System	80-81
Stainless Steel Sheets, Protection of	82-88
Upside-Down Fork-Lift Truck	296
Vacuum Brazing "Gnome" Engine Assemblies	131-132

NEWS AND ANNOUNCEMENTS
